HOT MIST

Steam Concrete Curing System

SUPER
HOT
MIST

1. Will replace any type of steam curing system.

2. Complete hydration is achieved with super hot mist that provides a 100% humidity environment.

100%

3. Lower gas bills by 85% during winter months.
Does not use any fuel during summer months.

4. Solid state programmable control system.

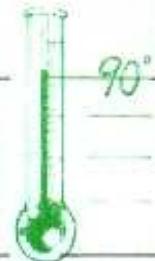

HOT WATER & PRESSURE

5. Using pressure to break down hot water into a very fine mist.

6. Will heat kiln temperature to above 90°F.

7. Cost of Custom Hot Mist Curing System can be retrieved in one year or less.

8. Works equally well for concrete pipe and block.
